Question Set #1 received from Bidders and Responses on behalf of Morgan County
Posted 05/05/2020

Morgan County, Colorado
RFP 2020-0514-002 Emulsified Asphalt

Question #1: Under "general instructions to bidders" line number 16, what are you specifically needing or asking? We haven't seen this question before on any bidders documents.

Answer:
The general instruction to bidder section is standard verbiage included on all bids posted by Morgan County. Morgan County posts bids for a wide range of product and services needs. Should a company warrant or guarantee their product/services for any time period, return that information on what you offer with the bid documents, if not, note that you do not on the exception to bid area on the bidder reply form.

Question #2: Under "bid requirements" line number 3, what are you specifically needing or asking? We are thinking you want a spec sheet of the emulsion (CRS-2R) or a certificate of analysis (sample) in accordance with C-Dot. If you are wanting the certificate of analysis, we only have a September 2019 copy. Due to the COVID19 outbreak regulations, etc. we are unable to get an updated analysis completed.

Answer:
A certificate of analysis of a test sample is what we are referring to. The most current one available will be acceptable. In your case September 2019. Purpose of this requirement is to demonstrate product compliance with the CDOT specification outlined in the bid document.
